

# Solutions Through Innovation:

## SMT-WebTest: Anywhere, Anytime

If you're looking for a reliable, efficient solution for low-stakes tests such as practice tests and self-assessments, SMT's new internet testing engine, SMT-WebTest™ is the answer! SMT-WebTest offers test-takers a simple, intuitive testing engine which features similar to those offered at dedicated testing centers.

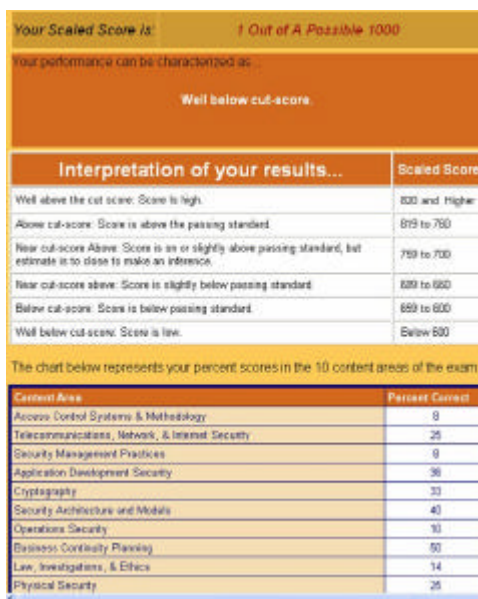

SMT-WebTest is configurable to your requirements:

- Color schemes and headers can be customized for your organization.
- You can add feedback after each question.
- You decide what information is included on test-takers' final reports.
- You can allow test-takers to navigate freely through the test or move sequentially.
- Tests can be made available to anyone or just to pre-qualified users.

Sample practice test on SMT-WebTest

Fees can be collected through a secure online payment credit card service, or you can collect the fees and send us lists of pre-paid users. Either way, practice tests are both a valuable service to your members and a great money-maker for your organization.

Sample test results report

At the end of the test, users receive a final report built to your specifications. It can be as simple as a total number correct score or as detailed as a listing of strengths and weaknesses. We can even arrange to conduct predictive validity studies that relate practice tests to your actual certification exam.

Finally, we also offer a suite of summary reports for your organization, ranging from a simple number tested report to item analyses to more detailed diagnostic information.

Several of our clients are already using SMT-WebTest to deliver online practice tests and other assessments.

Visit our website, [smtest.com](http://smtest.com), to try SMT-WebTest for yourself (go to the Solutions section).
