

Solutions Through Innovation:

Ask our clients...

"Over the past eight years that SMT has worked with (ISC)² as our testing service, they have consistently provided high quality work outputs, solid advice and guidance, and consistently meet their commitments, deadlines and extremely responsiveness to matters that arise in the course of running such a large program. To illustrate this point, it is important to note that the (ISC)² has placed an SMT staff member on its Management Committee charged with operating our organization, as we consider their talents and inputs to be an important component to our overall success."

Anthony T. Baratta, CISSP. Director of Professional Programs
International Standard for Information Security

"I highly recommend SMT to any organization involved in licensing or certification examinations. Their reliability, consistency, effective team work and scrupulous attention to detail, accuracy and time constraints make Schroeder Measurement Technologies the best firm for this task."

Deborah Worrad, CAE, Registrar and Executive Director
College of Massage Therapists of Ontario
